About

As a full-stack developer, I create dynamic and scalable web applications using various web technologies such as HTML, CSS, JavaScript, React.js, Node.js, Express.js, PHP, MySQL, MongoDB, and more. Web development is my passion, and I strive to be creative and proactive in my projects.

Experience

SOUSTITREUR.COM

Full-Stack web Developer | February 2023 – August 2023

- Develop and maintain responsive, user friendly, and visually appealing web applications using React.js with Redux, and PHP Slim on the backend.
- Develop and maintain a REST API that provides data to various web and mobile applications.
- Collaborate with coworkers to optimize the user experience, applications performance, and code quality using agile methodologies and best practices.

SERVIEDUCA

Front-End web developer | October 2021 – February 2023

- Conceptualize, design, implement, and maintain web applications using Angular and RxJS following the agile methodology.
- Collaborated with team members and clients to launch projects, receive feedback, and make improvements.
- Develop and deploy mobile applications using React Native and other frameworks, designed user interfaces, and published them on the Play Store.

Skills & abilities

Proficient in a range of programming languages, with experience in developing and maintaining responsive, user-friendly, and visually appealing websites using modern web development frameworks and tools.
